

Control Center

Geo-spatial Situational Awareness

The SAIMOS® Control Center is a map-centric application, based on geospatial data, and designed for Command and Control centers to display the current situation on a map clearly.

- Optimizes Enterprise Alarm Management Process.
- A Cost-effective solution that can be integrated into existing control center solutions.
- Supports better decision making and optimal reaction.
- Efficient route planning/patrolling for guard service.
- Significant cost savings and increased efficiency.
- Better coordination of security guards by using the SAIMOS® Guard App.
- Automatic Reports generation utilizing collected metadata.

Key features

Alarm management	<ul style="list-style-type: none"> ■ Map-centric user interface via web browser ■ Process optimization/support via geo-data ■ Sites to be protected are displayed on map ■ Linking to site-relevant information ■ Incoming alarms are displayed in both map and list views. ■ Display of metadata for incoming alarms ■ Automatic display of nearest guard based on travel time ■ Assign & Command the selected guard to handle the alarm ■ Triggering of direct reactions (e.g. alarm voice message via SAIMOS® WatchBox) ■ Automatic Documentation of alarm operations by integration of SAIMOS® Guard
Route calculations	<ul style="list-style-type: none"> ■ Route optimization for daily patrolling ■ Route optimization for emergency/alarm-handling drives ■ Reduction of personnel time and annual driven mileage
Report generation	<ul style="list-style-type: none"> ■ Automated generation of alarm reports for customers: <ul style="list-style-type: none"> • Documentation of the received alarm • Documentation of all actions with associated time stamp automatically • Documentation of Guard's activities via SAIMOS® Guard ■ Possibility to customize alarm reports
Integration	<ul style="list-style-type: none"> ■ Existing Control Center solutions ■ VMS (Milestone, SeeTec) ■ SAIMOS® WatchBox for easy integration of private customers ■ SAIMOS® Guard for mobile management of Guards ■ Custom
SAIMOS® WatchBox	<ul style="list-style-type: none"> ■ Alarm system based on video analytics ■ Perimeter protection of sites and properties ■ Alarms are only triggered by humans – not by animals ■ Available in stationary and mobile versions ■ For private and commercial use ■ Can be linked to SAIMOS® Control Center ■ Mobile customer app available
SAIMOS® Guard	<ul style="list-style-type: none"> ■ Inform/command/coordinate guards via mobile app ■ Communication of mission-relevant information ■ Communication of the guard's location to SAIMOS® Control Center ■ Possibility to record actions taken during a mission ■ Photo/video documentation for later report generation
