

Guard

The Mobile App for Guards

SAIMOS® Guard supports the Operation Controllers in the Control Center in coordinating the Guards and the Communication during on-site Operations.

- Commands are sent via the SAIMOS® Control Center to the mobile SAIMOS® Guards App.
- Guards confirm the receipt of the order and receive all necessary field data.
- Live guards' locations are transmitted constantly to the SAIMOS® Control Center for their own security and to increase the efficiency of alarm operations.
- The guards use the mobile app to document their activities with photos and videos which are sent automatically to the SAIMOS® Control Center.
- Automatic generation of Customers' Operation reports by the SAIMOS® Control Center.

Increase the efficiency of your operations today!

Overview process

1.	An alarm is triggered in the control center
2.	The main control center forwards the alarm to responsible operations control center (if applies)
3.	The operator assigns the alarm to a guard via SAIMOS® Control Center
4.	The guard confirms the receipt of the alarm via SAIMOS® Guard App
5.	SAIMOS® Guard informs the guard about the location, alarm class, etc.
6.	The arrival of the guard at the scene is time-documented utilizing GNSS & GIS
7.	The guard documents his activity using a simple selective dropdown list as well as photos, etc.
8.	The guard marks the operation as complete within SAIMOS® Guard
9.	The operator is informed within the SAIMOS® Control Center
10.	A report for the customer is generated by the SAIMOS® Control Center automatically
